

Application for a Statelessness Document (S-document)

Please read the explanation before you start filling in this application form.

For whom is this application form intended?

You do not have a Dutch residence permit and no ongoing application for residence in the Netherlands. You are stateless and you want to apply for proof of this. A person who is stateless has no official nationality. If you are stateless, you are not a citizen of any country. With the statelessness document (S-document) you show that it has been determined that you are stateless and that you may exercise the rights belonging to statelessness. For example, registration with the municipality in the Personal Records Database (in Dutch: BRP) and possibilities to become a Dutch citizen in an accelerated procedure. You can apply for an S-document in the following situations:

- You have a decision from the government or a court that determined that you are stateless. This may have been determined in the Netherlands or abroad.
- You were born stateless in the Netherlands. Both your parents are stateless.
- You were born in the Netherlands and your father is stateless. Your mother is stateless or unable to make her nationality known.
- You were born in the Netherlands and you have no father according to the law for example because your father died before you were born or is not known. Your mother is stateless or unable to pass on her nationality.
- You only have the nationality of a state that the Dutch government does not recognise.
- Your S-document is no longer valid and you want to apply for a new document.
